The Malignant Pleural Mesothelioma (MPM) Staging Project is an international effort to study and improve the current staging system for MPM. This project is being conducted by the Staging and Prognostic Factors Committee – Mesothelioma Domain of the International Association for the Study of Lung Cancer (IASLC), in collaboration with the International Mesothelioma Interest Group (IMIG). Data are collected by data transfer or entered by means of a secure, web-based, electronic data capture system provided by Cancer Research And Biostatistics (CRAB) in Seattle, WA, USA.
